

## PEACE SILVER DOLLAR PITCH

Hey \_\_\_\_\_, this is \_\_\_\_\_ from Premier Coin Galleries. How's everything today? We haven't spoken in a while, but I wanted to chat and see if you've been watching the gold and silver markets lately. Both gold and silver have risen, and we feel it's only the beginning! With the United States debt and balance sheets increasing rapidly, many investors have been jumping in with both feet!

I'm calling you today because all the current attention and activity surrounding gold and silver has given our company some great opportunities to buy some old estates and portfolios of scarce and hard-to-find coins! Coins that haven't been on the market for decades have become available, and being one of the biggest companies in the country, they call us first!

We just closed on an estate that had over 12,000 Peace Silver Dollars. Have you ever heard of these silver dollars before? They were minted after WWI from 1921 until 1935 and have disappeared in the markets over the past 90+ years. A coin once believed to be common only 30 years ago isn't often available in brilliant uncirculated quality. That's why I was excited when I saw these beautiful, clever, uncirculated 100-year-old coins! Usually, if you were even lucky enough to find them, you'd be paying upwards of \$\_\_\_\_-\$\_\_\_\_ per coin, but by us buying every coin they had in the

estate and laying out huge dollars, it gave us a chance to use our buying power to save our clients' money. We have these today for only \$\_\_\_\_\_ per coin! That's a massive discount in any market but having them today as silver is starting to get mainstream coverage as the sleeping giant for investors could be the absolute best investment you make all year!

We're offering packages ranging from 500-coin boxes down to units of 100 coins per order. This flexible approach allows you to invest at a level that suits you. Given the current prices and the potential value of each of these exclusive Peace Silver Dollars, consider the 500-coin box. Invest with us today, and I guarantee you'll be impressed with these coins' quality and potential Returns. Are you ready to seize this opportunity?
